

John Wick 2

This movie genre is nothing more than action, crime and thriller. It's set in present and takes place in New York and little part of Rome.

The main character is John Wick acted by Keanu Reeves. It's the second installment in John Wick film series.

Body 1

The plot revolves around four days after the events of the first film. He goes after his stolen car. That is located in a warehouse, the owner of that warehouse is the cousin of Russian mafia boss, who John killed. After killing the all the guards and having his car wrecked he steps in the office and offered peace with him. The cousin accept it and John went to home.

He comes home and pets his new dog.

His former boss, Santino D'Antonio visits his house the next night and request his service one more time. John said to him he already retired and doesn't want to do anymore killing. Then his boss explained without him he wouldn't be rich and having a 'great' life and show his contract where John signed his blood oath. John still decline the request and knows the consequences. Santino leaves and blows up his house with a grenade launcher. John survived and thankfully his dog too.

After tracking Santino down he accept the request and have to kill his sister, who is in the High Table, a group of powerful assassins. So Santino can claim his seat after she died. He succeed and then one of Santino bodyguards are trying kill him to clean the "loose ends". They all got killed and John is hunting Santino to finish him off.

John broke on of the two rules of the Continental, a organization of assassins.

Never kill somebody in the continental and always listen to the maker.

He kill Santino in on the ground of the continental and gets a bounty on his head worldwide.

Body 2

The acting is not worst or better than the first movie, the second installment has definitely more focus to the story. The ending was great, John was running from the bounty hunters while everyone was getting a notification of him having an bounty on his head.

Conclusion

Great follow-up story of the first one. The action and some little detail to references the first movie was great. The second movie of John Wick is just awesome. Worth seeing the second movie.

PS: Check Anthony's review about the first installment.
